Map of the Earth

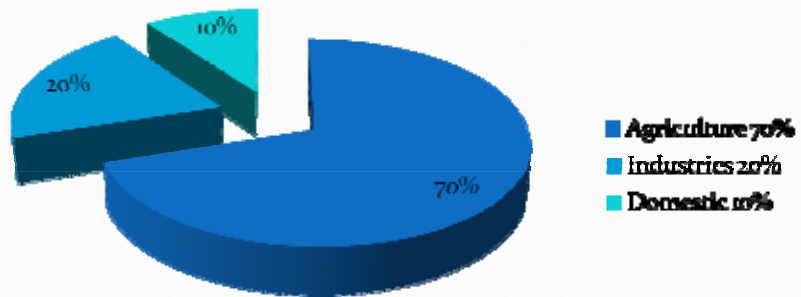

Water is a finite resource!

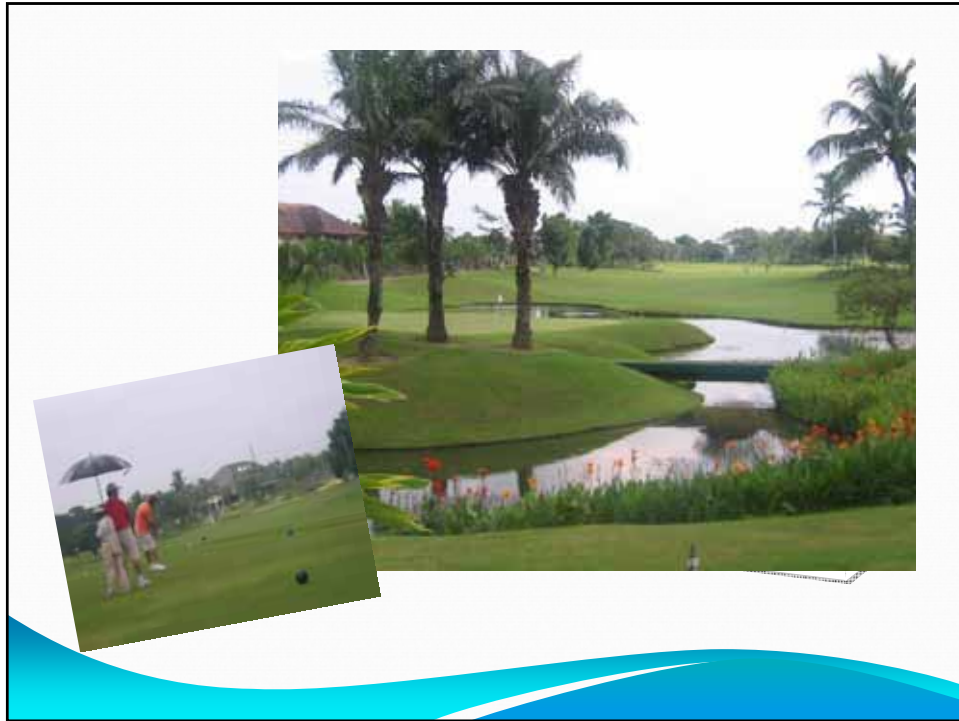

Agriculture

Extracted Groundwater Consumption

Source: PWS&D

Golf Course Irrigation

The Manila Southwoods Golf & Country Club

- Reduced annual water consumption from over 225,000,000 gallons in 1997 to less than 170,000,000 in 2006 for 36 holes
- Southwoods is home to more than 100 species of birds

Water Conservation

- Fix leaks immediately
- Plant native grasses along perimeters
- Install water conservation signs
- Hand-watering dry areas on green & tees
- Use wetting agents
- Full irrigation system field check twice a year

Water Quality Management

- Designate no-spray zones
- Create and maintain buffer zones
- Test water quality
- Use slow release fertilizers
- Install a waste water treatment facility
- Install oil separators at the equipment wash and repair/parking area

Remember

There is no life
without water,
conserve today
for a better
tomorrow.

Thank you.
